Introduction

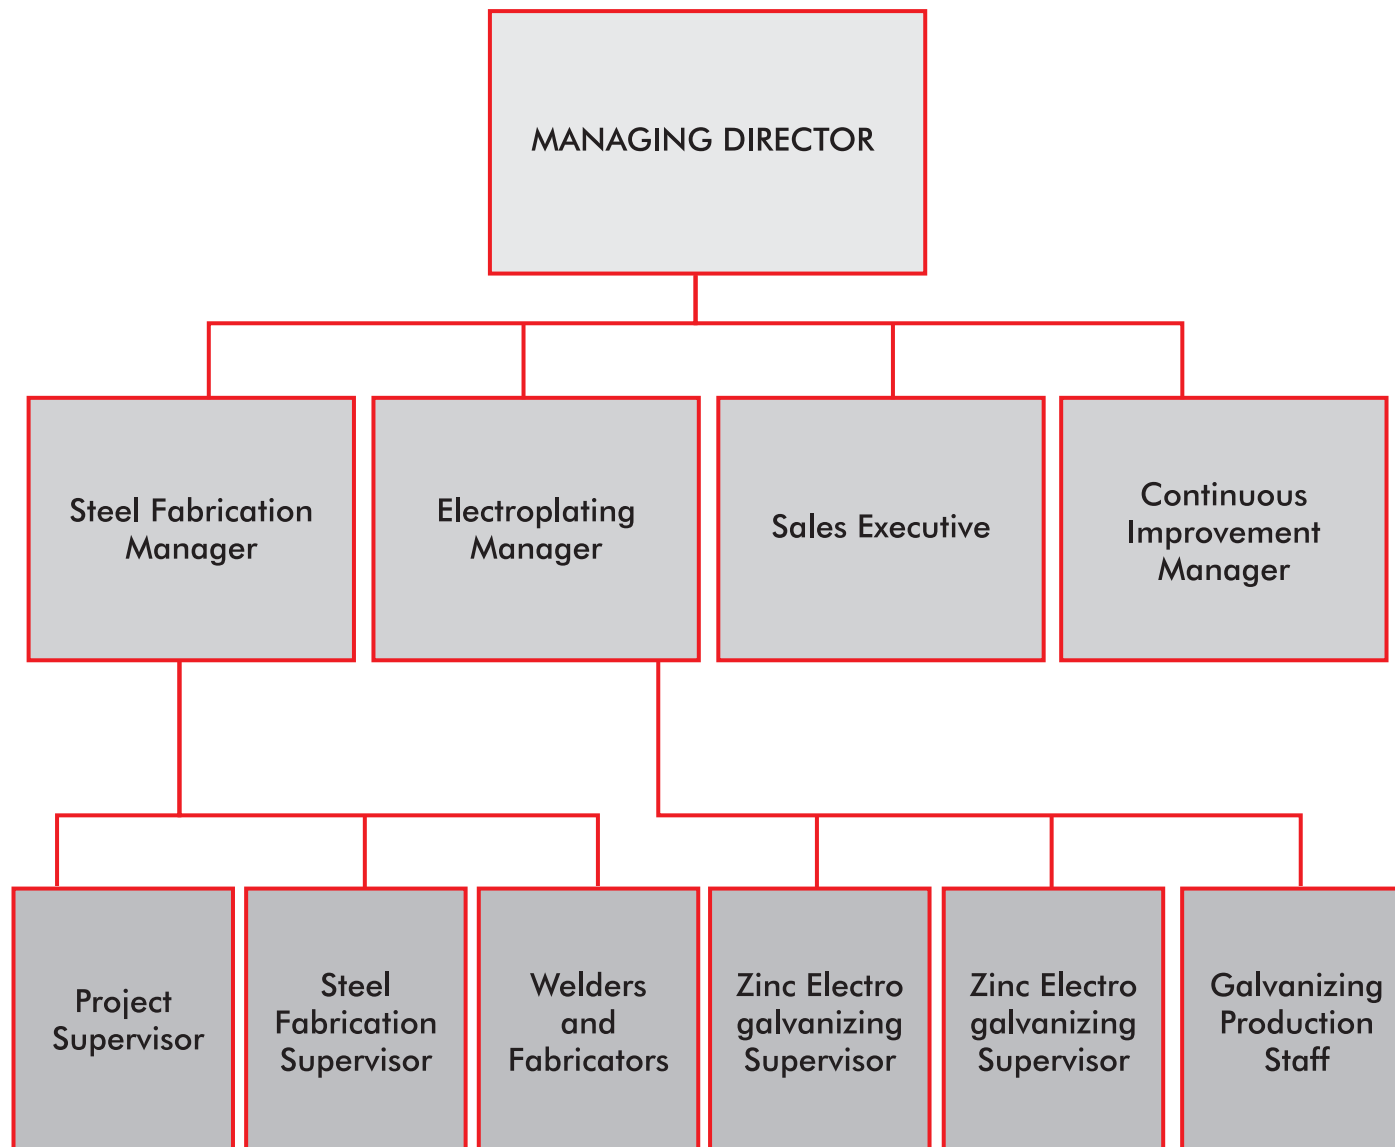

Since its founding in Dubai in 2003, Azhad Industries Co. L.L.C, a sister company of Azhad Trading Co. L.L.C, founded in 1978, has become the leading supplier of electro galvanizing services and steel fabrication products in Dubai, UAE. Our experiences in this industry exceed well over 15 years. Azhad Industries is headquartered in Dubai, UAE. Azhad Industries has been delivering excellence since 2003 and has continued to deliver impeccable quality products to all our clients. We specialize in metal fabrication and galvanizing. The company's priority throughout the years has been innovation which allows us to continually satisfy our clients in enhanced and advanced ways. We provide immaculate services with different metals ranging from aluminum, mild steel (MS), stainless steel (SS), etc. Our hard-working and extremely qualified employees and high-tech machinery makes our services distinguished. Our professionalism and consumer service has kept all our clients very pleased with our services and we continue to provide these facilities with complete dedication and solutions to all of your needs.

Primary Line of Business: Zinc Electroplating Galvanizing

Secondary Line of Business: Steel Fabrication Workshop

Tertiary Line of Business: General Trading including but not limited to, construction materials, shafting bars, round bars, flat bars and other safety equipment through Azhad Trading Co. L.L.C. We are also one of the oldest scrap dealers in U.A.E dealing in all kinds of ferrous and nonferrous materials.

Organizational Chart

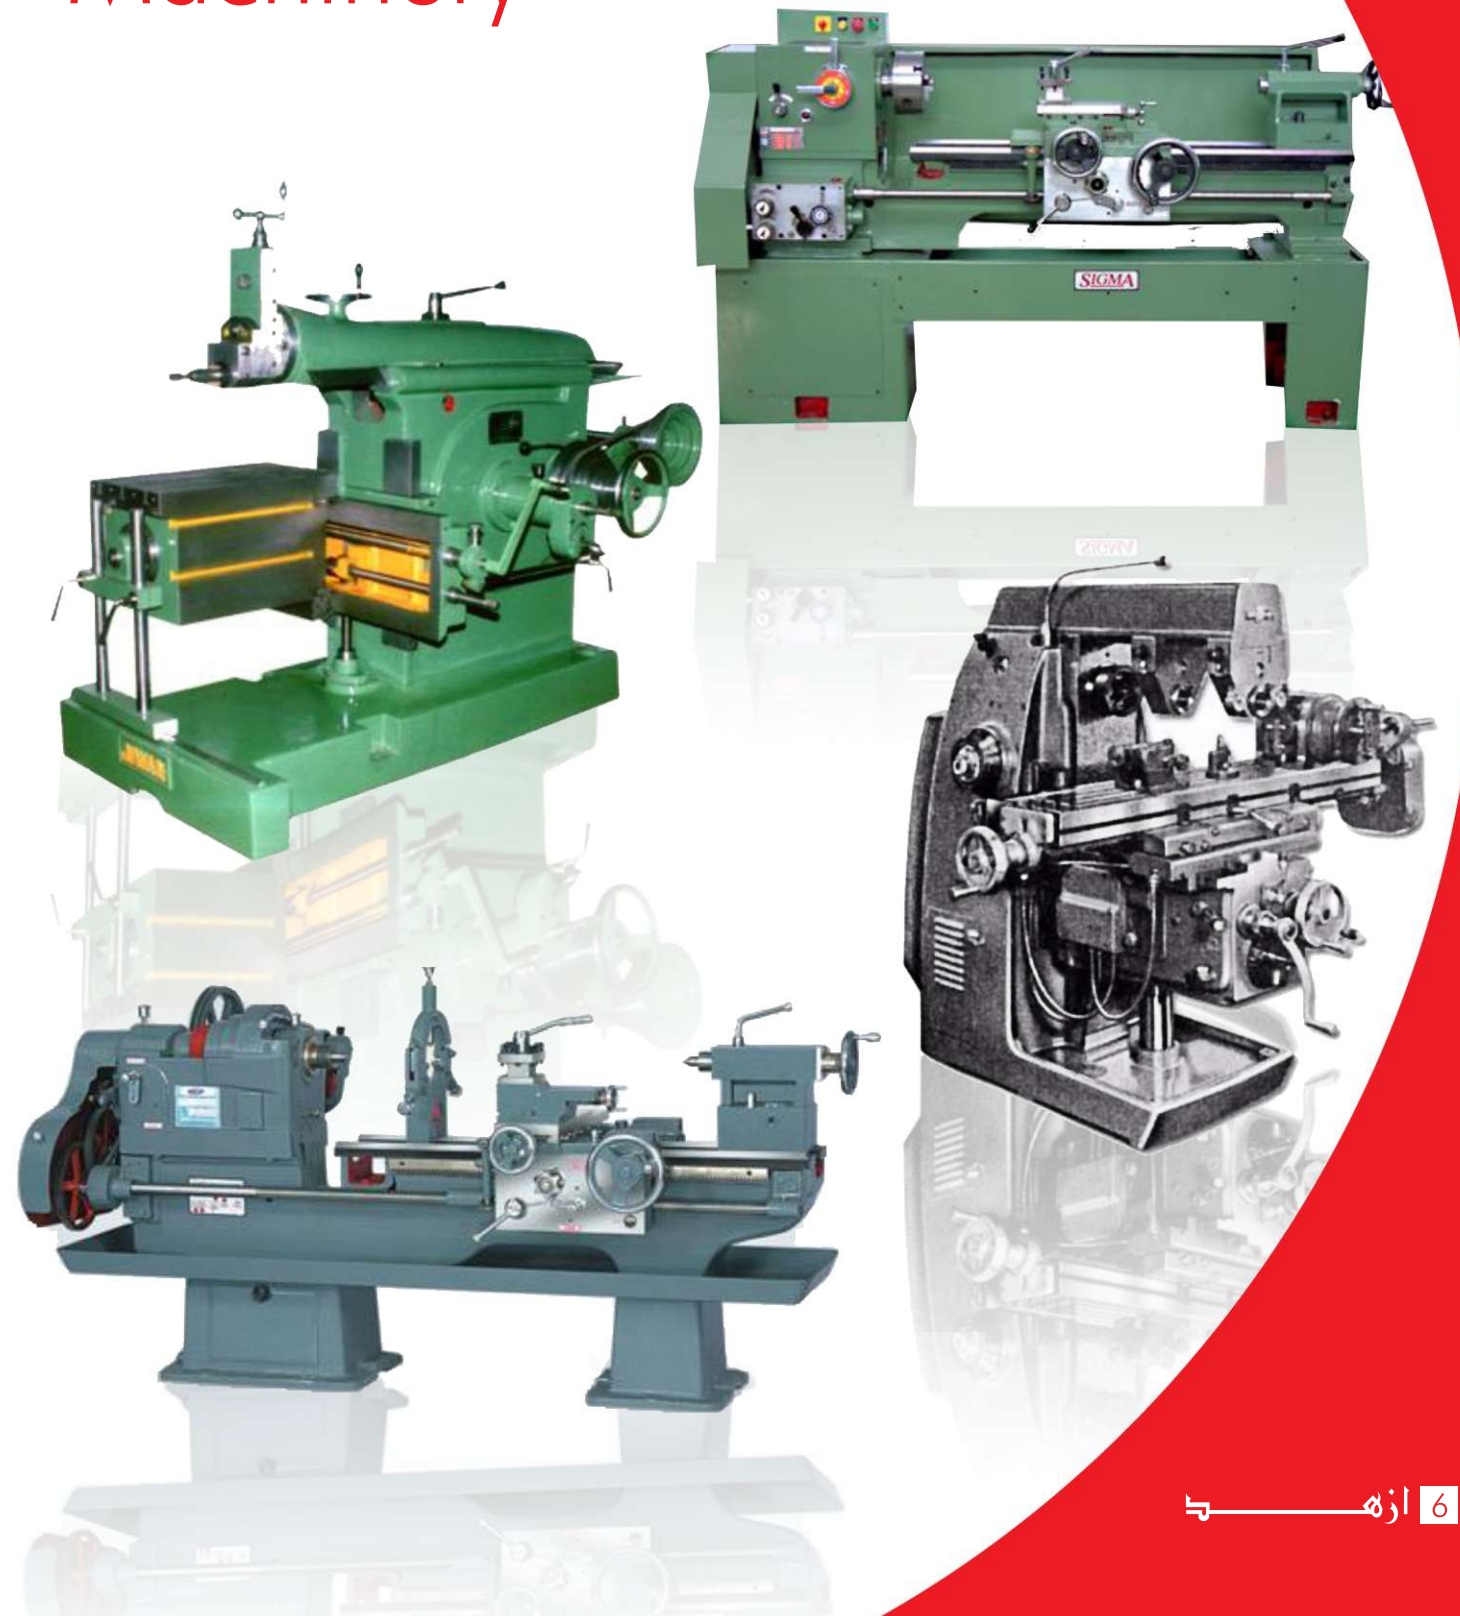

Key Processes- Metal Fabrication

For the steel fabrication factory, we have a full-fledged workshop capable of handling several different work jobs and projects in S.S (Stainless Steel), M.S (Mild Steel) and aluminum. We specialize in steel fabrication including gates, grills and fences and have over 10 years of experience in various large and small projects. Some of our projects in architectural casting include balustrade decorative, gates, balconies, security grills, fence, brackets and Aluminum/Glass doors and windows. We also provide cutting and bending services of up to 10 mm thickness of sheet in M.S and aluminum. Examples of some of our regular projects and work jobs are provided below:

- Fabrication of MS & SS Grating structure of all sizes and types
- Fabrication of Anchor Bolts with all sizes & holes
- Fabrication of U Bolts
- Steel structural Fabrication and Foundation Bolts
- Fabrication of All kinds of Fencing
- Fabrication of Frames in MS & SS Grades.
- Fabrication of Building Brackets of all sizes & types
- Fabrication of Decoration items in MS & SS for Buildings lifts & lounges.
- Fabrication of Gates & Grills in MS & Aluminium

Detail Of Metal Fabrication Machinery

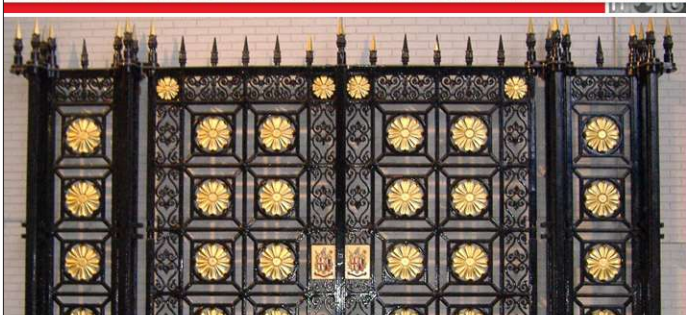

Metal Fabrication Equipment

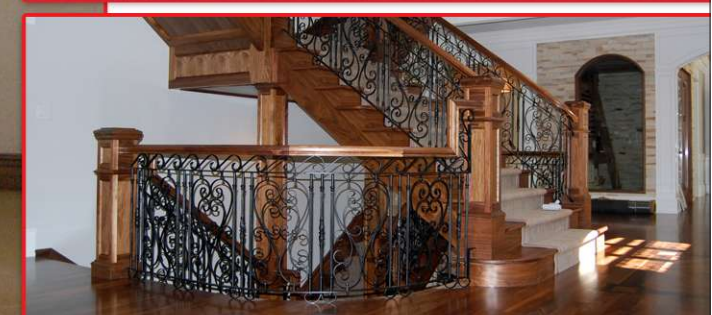

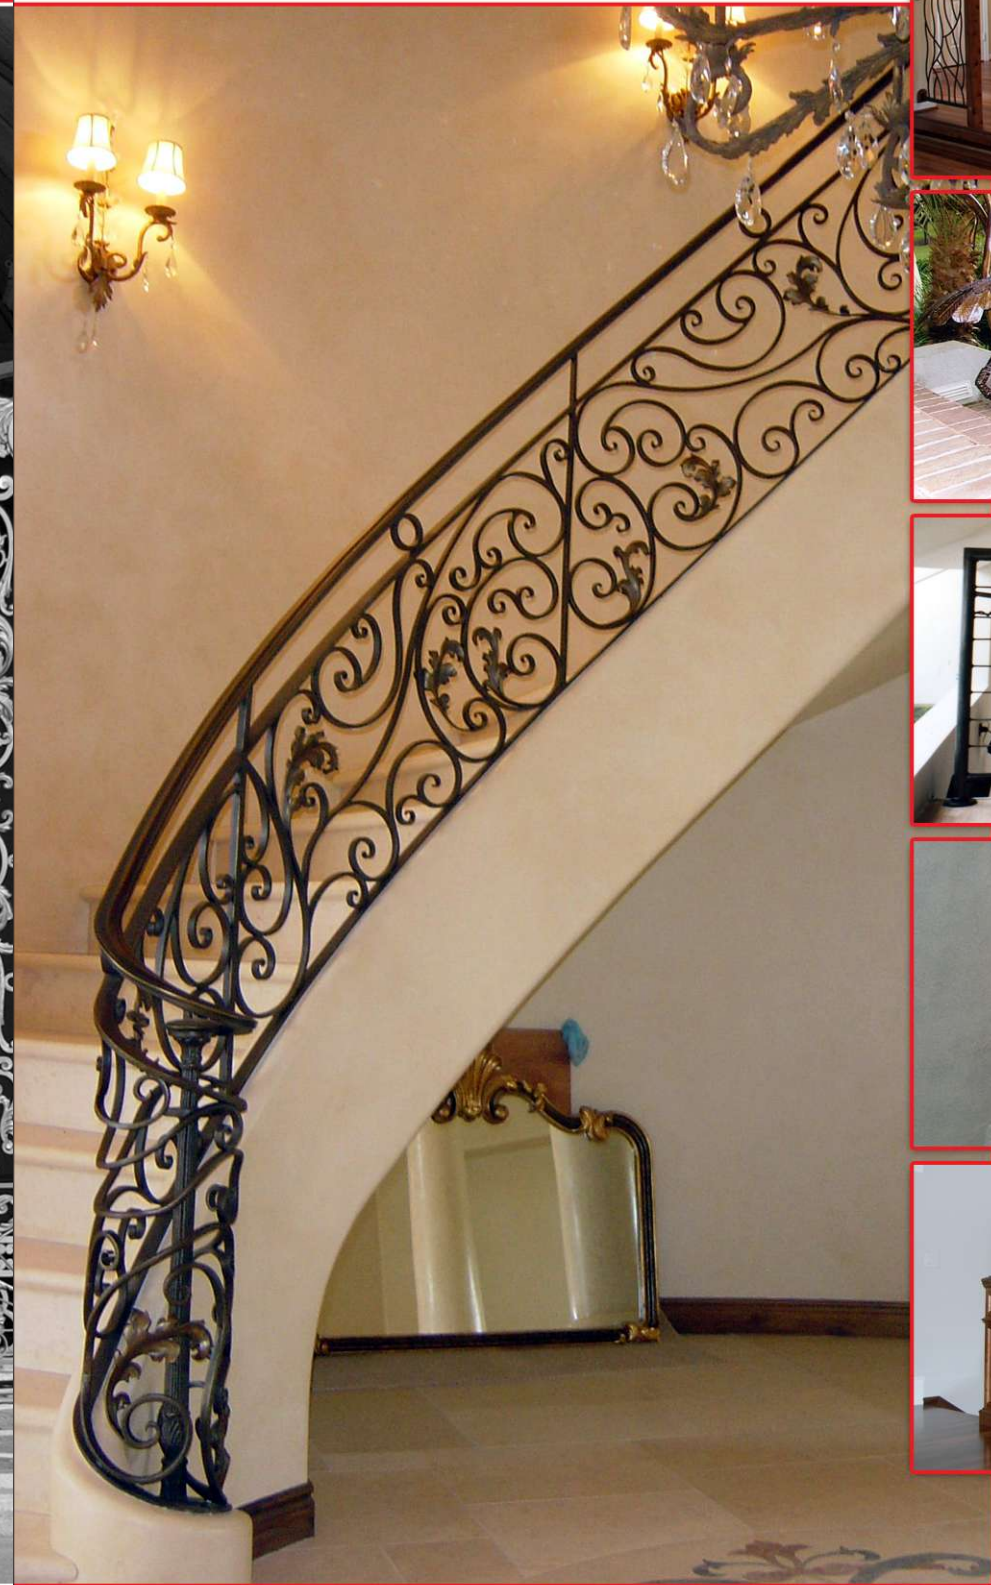

Our factory is fully equipped with all type of machines for fabrication, cutting, machining of wide range of products from a minimum gauge of millimetres to industrial sizes. Few of the machines & equipments that are being used are as under.

- Milling Machines
- Welding Plants
- Axe cutting Machines
- Sheet Cutting Machines
- Hydraulic Press
- Drilling Machines
- Shaper Machines
- Lathe Machines
- Power Press
- Hydraulic Sheet cutting Machine
- Bending Machines
- V. Callipers for large scales

Steel Fabrication & Casting

Die Making & Punching

Azhad's Punch & Die section manufactures steel punches, dies, shear blades and tool holders for customers across the Steel Fabricating Industry. We are UAE base punch and die manufacturer servicing customers in an ever changing world.

Quality and service have long been our top priorities. Industries such as Steel Construction, Structural Fabrication and Metal Building have endured decades of change with us. We have never lost sight of our goal: to be the leading supplier of Punches, Dies and related tooling across all major industries.

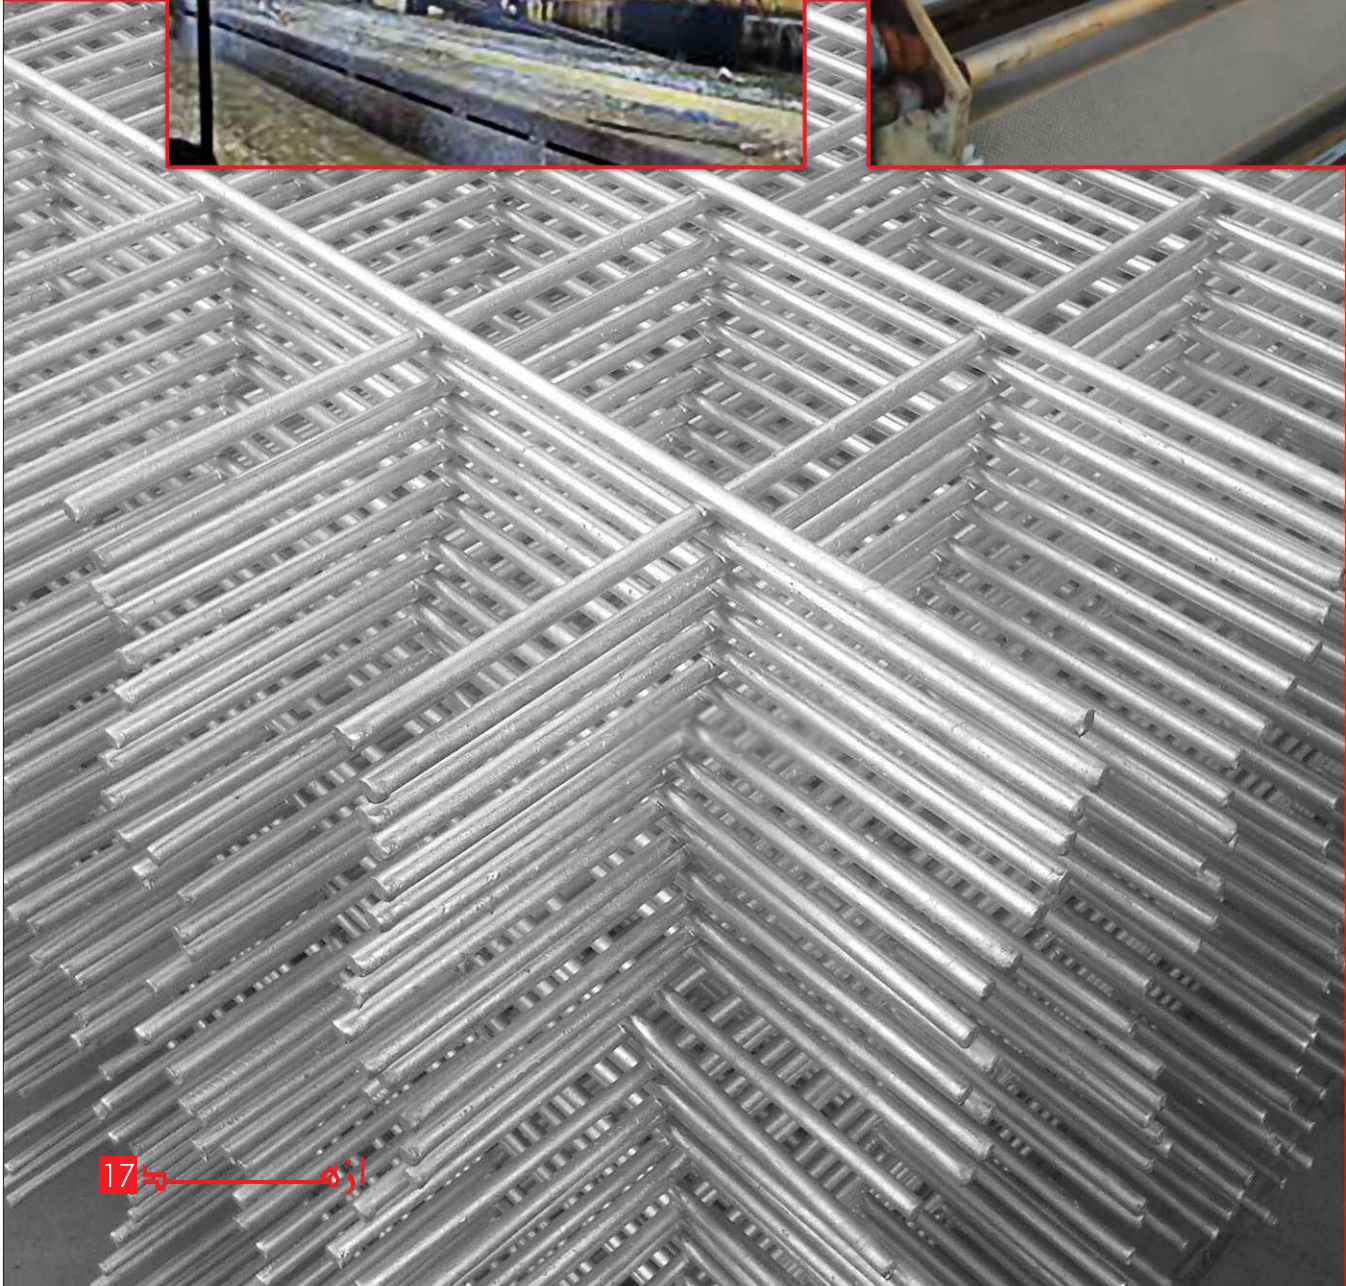

Key Processes- Zinc Electroplating- Galvanizing

Currently, Azhad Industries Co. L.L.C operates with a zinc electro galvanizing capacity of close to 8 metric tons per day. We are able to achieve this capacity by operating large 6 meter tanks, and several barrel tanks for production of material with various sizes, shapes and weights.

Our experience in zinc electro galvanizing exceed 15 years of service and have individuals who are capable of understanding each customers requirements and implementing quality control and production procedures accordingly. Some of the processes we offer include: hot dip finish, yellow finish, black and dull finish as well as standard silver finish up to 50 microns.
